Danfoss Power Solutions showcases engineering and design capabilities at EMO MILANO 2021

NORDBORG, DENMARK – Danfoss Power Solutions will reveal its latest industrial solutions for the metal forming market and update attendees on the recent acquisition of Eaton’s hydraulics business at [EMO MILANO](#)—the leading trade show for the manufacturing industry taking place in Milan, Italy, from Oct. 4-9.

Danfoss will highlight varied technologies, as well as its proven engineering expertise and creative system design capabilities at Hall 01 - Stand A28 B23, Fiera Milano. The solutions on display include both power management and control products, as well as hydraulic hoses and connectors from globally known and trusted brands like Vickers, Aeroquip, Walterscheid, and more.

As well as giving live demonstrations of AxisPro intelligent valves, Pro-FX 2.0 configuration software, and M-WF385Xplus WALFORM tube forming machines, Danfoss will also showcase solutions for key metal forming applications, including bar feeder and machining centers, hydraulic presses, and cutting or sawing machines.

“As an industry leader in technology and design, our experts are on hand at EMO MILANO to show how we’re engineering solutions that help machine builders succeed in the market,” comments Alessandro Carmona, president, Industrial solutions, Danfoss Power Solutions. *“We’re also showcasing how we’re supporting tomorrow’s key trends—such as energy efficiency, Industry 4.0, connectivity, and safety. From traditional hydraulic systems to the latest developments in IoT or electrification our technologies help customers engineer and optimize more competitive solutions that enable the green transition.”*

Eaton hydraulics acquisition

Danfoss is an even stronger technology partner following the recent €3 billion acquisition of Eaton’s hydraulics business in August 2021.

Adding approximately 10,000 employees worldwide, the deal enables Danfoss to offer the broadest selection of mobile and industrial hydraulics solutions on the market, as well as to take the lead in digitalization and electrification. The company's distribution channels have also been significantly boosted, while its local application support and geographical reach have increased considerably.

Mauro Mezzina, regional sales manager, Italy, Danfoss Power Solutions adds:

"This is an exciting new chapter for our business and our people. Our expanded team is a global leader in mobile and industrial hydraulics, with a long history of innovation and industry-leading expertise. With a proven track record of solving unique problems in a greener and more energy efficient way, our experts are ready to apply their engineering knowledge and creative system design capabilities to deliver the best possible solutions for any customer application. Around the world, we can help enable cost savings, intelligent machine capabilities, and much more, so our customers can stand out in the market."

To learn more about how Danfoss is engineering tomorrow's industrial machinery or evolving its business and product portfolio, visit at Hall 01 - Stand A28 B23, Fiera Milano at EMO MILANO 2021.

About Danfoss

Danfoss engineers advanced technologies that enable us to build a better, smarter and more efficient tomorrow. In the world's growing cities, we ensure the supply of fresh food and optimal comfort in our homes and offices, while meeting the need for energy-efficient infrastructure, connected systems and integrated renewable energy. Our solutions are used in areas, such as refrigeration, air conditioning, heating, motor control and mobile machinery. Our innovative engineering dates back to 1933 and today Danfoss holds market-leading positions, employing 37,000 and serving customers in more than 100 countries. We are privately held by the founding family.
